Response to Arguments

1. Applicant's arguments, see Remarks, filed 6/6/2007, with respect to claims 1 and 5-9 have been fully considered and are persuasive. The rejections of claims 1 and 5-9 have been withdrawn.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: Claims 1-5 and 7-9 are allowable over prior art references because related references do not disclose a decoding method comprising generation of 3-bit decision data directly from computer coordinate values output from a demodulator using a phase difference (claims 5 and 9), viterbi decoding the 3-bit decision data to generate 1-bit data, re-encoding the 1-bit data, quantizing demodulated I channel and Q channel information based on coordination values from the demodulator, time delaying the quantized data until re-encoding is finished, and decoding the quantized data using the re-encoded data

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
